Club Car

URBAN 

Club Car European manufacturing plant

our history.

With more than 60 years of experience in innovation and design acquired by producing small-wheel vehicles, Club Car is a leading manufacturer of gas and electric golf, utility and personal transportation vehicles.

Founded in 1958, the Club Car product portfolio has grown to include much more than golf cars, now encompassing vehicles for commercial and consumer markets, built with an uncompromised desire for superior performance. As an industry leader in electrification and sustainability, Club Car is proud to be at the forefront of environmentally responsible Zero Emission Vehicle (ZEV) technologies.

Club Car has sought to become a global leader in the spaces it operates in, strategically partnering and merging with other leading manufacturers to drive new possibilities.

In 2022, Club Car welcomed Garia into its family of companies. In that year, Club Car Urban superseded the Garia Utility vehicle which was initially launched in 2015 and is manufactured in Europe.

The Urban line represents a natural complementary addition to the Club Car Utility range of vehicles. Adding the Road Legal component into the portfolio contributes to reach a new category of L7e and N1 vehicles.

compare URBAN

Driven by excellence, committed to safety

Every detail of design, fabrication and assembly at Club Car is executed with an uncompromised desire for superior performance. Urban vehicles come standard with street-legal safety and cab features

such as 3-pt seatbelts, head and tail lights, rear bulkhead glass, automatic park brake, speed switch, premium instrument cluster and lockable storage.

Efficient, safe and green, the Club Car Urban range comprises three models to help you get the job done. The road-legal N1 and L7e models have maximum speeds of 50km/h and 40 km/h respectively, while the non-road-legal XR has a top speed of 30km/h.

built to handle
any job.

The Club Car Urban is built to handle any job. Whether it's facilities maintenance, moving equipment, or delivering food or packages, with the durability of a pickup truck and the efficiency of an electric vehicle, the Club Car Urban gets the job done.

elevate the experience.

- No Noise Pollution
- No Toxic Nuisance
- Autonomy up to 205 km
- Various Rear Bed Configurations to Suit Your Requirements

Safety

- Brake in an instant
- Crash-tested to the highest standards including front collision impact test (as known from the automotive industry)
- No blind spots

Comfort driving

- Convenient door opening allowing for air circulation within the car
- Wheel in front of the cabin allowing to drive like a regular car

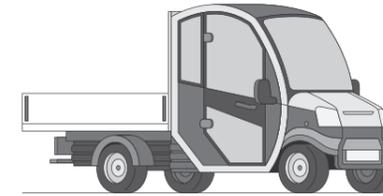

Spacious Cab

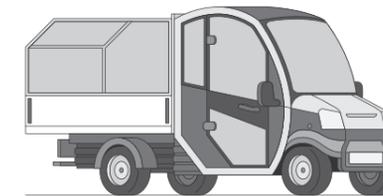

- Very large and spacious cab with sufficient elbow room
- Low seating position ideal for Stop & Go applications

Rear vehicle configurations

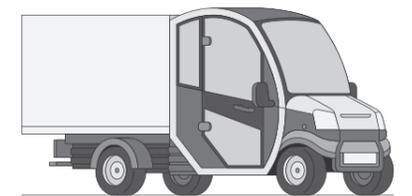

Short chassis

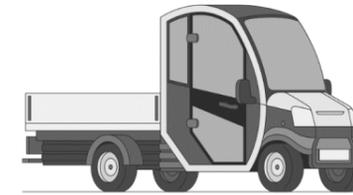

1,25 m fixed or tipping pickup bed

1,25 m pickup bed with mesh cage
(tarpaulin option also available)

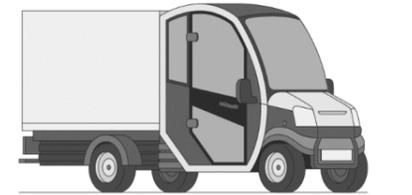

1,6 m³ closed vanbox

1,6 m fixed pickup bed

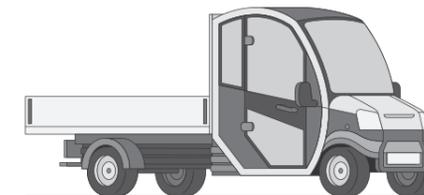

1,6 m pickup bed with tarpaulin body
(Mesh cage option also available)

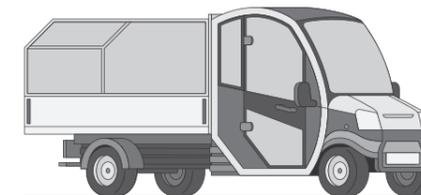

2,1 m³ closed vanbox

Rear vehicle configurations

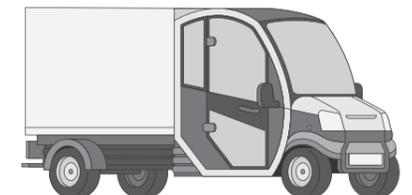

Long chassis

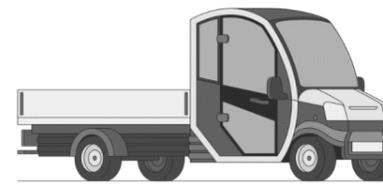

1,6 m fixed or tipping pickup bed

1,6 m pickup bed with mesh cage
(tarpaulin option also available)

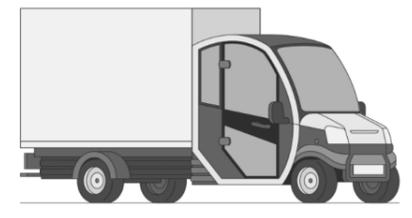

2,1 m³ closed vanbox

2,1 m fixed or tipping pickup bed
(Not on L7e)

2,1 m pickup bed with tarpaulin body
(Not on L7e)
(Mesh cage option also available)

2,8 and 4,1 m³ closed vanbox
(Not on L7e)

All vehicles available with right-hand and left-hand drive
